Fresh Graduate in Computer Science

PROFILE

Computer Science student passionate about mobile app design, user experience, and digital product development. Interested in creating intuitive, accessible, and meaningful experiences through UI/UX design, prototyping, and product thinking with a strong focus on user-centered innovation.

TECHNICAL SKILLS

UI/UX Design | Mobile App Design | Figma | Wireframing | Prototyping | Usability Testing | Accessibility | Product Thinking | Design Systems | SwiftUI | Xcode | Swift | Unity | C# | AR Foundation | ARCore | Python | Java | HTML | CSS | SQL | MySQL

LANGUAGES

Bahasa Indonesia – Native

English – Advanced

CORE COMPETENCIES

Leadership

Analytical Thinking

Public Speaking

Problem Solving

Adaptability

Team Collaboration

EDUCATION

Bachelor of Computer Science — Aug 2022 – Present

Universitas Pembangunan Nasional Veteran Jakarta

- GPA: 3.91 / 4.00
- Completed 10+ projects across Python, Java, C++, and web technologies.
- Advanced to the university stage in PKM-GFT, competing against 100+ project entries.

WORK EXPERIENCE

SIS Intern — 01 July 2025 – 30 November 2025

PT PLN Indonesia Power Unit Bisnis Pemeliharaan

- Designed user experience and web interface for a meeting room and company car reservation application.
- Focused on creating a more intuitive, efficient, and user-friendly reservation workflow.
- Collaborated with stakeholders to align interface design with operational needs and user requirements.

PROJECTS

Quack

UI/UX DESIGN · MOBILE APP · 2024

Designed a mobile disaster-evacuation guide focused on emergency clarity and rapid decision-making. The project emphasized user-centered information architecture, intuitive task flow, and an interactive prototype that simplified critical actions in high-stress situations.

RUMA

UI/UX DESIGN · WEB DEVELOPMENT · 2025

An internal web application for booking meeting rooms and company vehicles. I designed the system and implemented the booking experience in CodeIgniter 4, creating a consistent workflow for booking, scheduling, and tracking requests.

BUZZ BUZZ

UX REDESIGN · DASHBOARD · 2025

A mobile entertainment app for reviewing and rating films and TV series. I contributed to user research, designed the main flows, and translated the interface into front-end code for a better content discovery experience.

Bot Network Detection

UI/UX DESIGN · WEB DEVELOPMENT · 2026

A web application that uses machine learning to detect suspected bot accounts on TikTok. I designed the analytical workflow and integrated the FastAPI service, model output, and visualizations into a usable product experience.

TRAINING & CERTIFICATIONS

Student Trainee – AI & IoT Product Development — Feb 2024 – May 2024

Samsung Innovation Campus Batch 5

- Completed intensive vocational training on coding, IoT, and AI for Industry 4.0.
- Developed Python algorithm implementation and AI/ML fundamentals.
- Designed and prototyped IoT systems through real-world case study analysis.

BNSP Certification — 07 November 2025

Asisten Program

- Certified through the national competency certification program in support of digital and technical skill development.

ORGANIZATIONAL EXPERIENCE

Mentor – Vocal Training Program (POV 2023)

Oct 2023 – Nov 2023

Trained 10+ new members in singing techniques, organizational skills, event planning, and teamwork within the Gita Advayatva Student Choir.

Public Relations

Sep 2023 – Oct 2023

Managed internal and external communications and established 5+ MoU agreements with partner organizations for PAB 2023.

Fundraising & Business Team

Dec 2022 – Jun 2023

Executed sales strategies that increased revenue by 10% through diversified food, beverage, and merchandise offerings during the Mozzafiato Annual Concert.

Foreign Language Sector Member

Sep 2020 – Aug 2021

Produced more than 10 motivational posters and hosted an English-language podcast as part of Language Month initiatives in the student council.
