INTAN FEBYOLA PUTRI DWINA SIDABUTAR

Kebon Jeruk, West Jakarta, Indonesia | 08111864142 | intanfebyola@gmail.com | linkedin | Portfolio

PROFESSIONAL SUMMARY

Informatics graduate with hands-on experience developing internal web applications and collaborative software projects across frontend, backend, API integration, and relational databases. Built a reservation application during an internship at PLN Indonesia Power and contributed to a microservices-based ticketing platform using Node.js, Express.js, React.js, Kafka, MySQL, and Docker Compose. Interested in software engineering, full-stack development, and enterprise system integration and AI-assisted development.

EDUCATION

Universitas Pembangunan Nasional Veteran Jakarta

Informatics | GPA: 3.91/4.00 | Aug 2022 – Sep 2026

• Completed 10+ academic projects using various programming languages.

• Relevant Coursework : Service Oriented Architecture, Object-Oriented Programming (OOP), Computer Systems & Architecture

TECHNICAL SKILLS

Programming: Java , JavaScript, Python, Kotlin, SQL

Frontend: React.js, Next.js, HTML/CSS, Tailwind CSS, Figma, Vercel

Backend & Integration: Node.js, Express.js, CodeIgniter 4, REST API, API Gateway, Microservices

Database & Messaging: MySQL, mysql2, Apache Kafka, Asynchronous Service Communication

Documentation & Testing: Swagger API Documentation, Postman, Functional Testing, Integration Testing, Debugging

Development Tools & Security: Docker Compose, Git/GitHub, JWT, OAuth 2.0

PROFESSIONAL EXPERIENCE

PT PLN Indonesia Power – Unit Bisnis Pemeliharaan | SIS (System Information & Security) Intern | Jul 2025 – Nov 2025

• Developed an internal web application for reserving meeting rooms and company vehicles, covering UI/UX design, frontend, backend, and MySQL integration using CodeIgniter 4.

• Gathered operational requirements from employees and translated them into application workflows; implemented booking validation to prevent schedule conflicts and support multi-day reservations.

• Demonstrated the application, guided users, and refined features based on stakeholder feedback.

Pusat Pengolahan Data dan Dokumen Perpajakan (PPDDP) | Intern, Household Affairs, Personnel & Internal Compliance Division | Oct 2024 – Jan 2025

• Contributed to frontend development of SIMPAN, an internal inventory administration application.

• Reviewed 6,000+ tax documents and processed 1,000+ documents for digitization and archival management.

SELECTED PROJECTS

Ticketing Platform – Full-Stack & Microservices Project | Academic Team Project

• Contributed to REST API development and API Gateway routing with http-proxy-middleware in a team-built ticketing platform using Node.js, Express.js, and React.js.

• Worked on Kafka-based asynchronous service communication, MySQL data management, and JWT/OAuth 2.0 authentication.

• Contributed to Swagger API documentation, Docker Compose deployment, QR-code ticket generation, and ticket-code validation.

Media Monitoring System – Full-stack & Microservice Project | Academic Team Project

• Designed the monitoring dashboard and MySQL database; built Express.js REST APIs integrating Twitter API, YouTube Data API, and Serper.dev to collect mentions from X, YouTube, and Google News.

• Implemented Redis caching and background workers for scheduled mention collection, deduplication, language detection, and sentiment classification; developed search and multi-criteria filtering.

• Added JWT authentication, password hashing, activity logs, automated backups, inactive-project cleanup, and PDF report export; tested authentication, filters, reporting, backups, and error states.

TikTok Bot Network Detection System – Full-Stack Development | Undergraduate Thesis

• Developed a modular text-analysis pipeline using TF-IDF, Canopy Clustering, and Kruskal's Minimum Spanning Tree algorithm on datasets of 100–1,000 TikTok comments.

• Built backend APIs and integrated Cytoscape.js to visualize account relationships, clusters, and suspicious scores.

• Designed and executed 12 manual functional test scenarios and six integration test scenarios; documented expected results, actual results, and pass/fail status.

• Verified API requests, asynchronous job polling, intercomponent data flow, and graph rendering using browser DevTools and server logs.

Personal Portfolio Website | Personal Project

• Built a personal portfolio using Next.js and deployed it on Vercel to present software projects, technical skills, and professional experience.

CERTIFICATIONS

Certifications:

- Software Engineer – HackerRank (Oct 2026)
- Program Assistant – LSP UPN Veteran Jakarta (Nov 2025)
- Data Analytics – Certiport (Oct 2025)
- Deep Learning with TensorFlow – Cognitive Class (Apr 2025)
- Samsung Innovation Campus Batch 5 (Mar–Sep 2024)
- Employability Training – Wadhwani Foundation (Dec 2023–Feb 2024).
